2" Large Single Port

Type A Flangeless CL 150 – 600

2" Large Single Port Type A Flangeless Flowgrid® Valve with Series 20 Pilot

OVERPRESSURE PROTECTION

The Flowgrid[®] Valve is bi-directional and has a full ANSI rating on both the inlet and outlet. Overpressure protection is required only if the pressure can exceed the flange or body rating.

The pilots, like most regulators, may have an outlet pressure rating lower than the inlet pressure rating. If this is the case then some external form of overpressure protection must be provided for the pilot.

Anytime the Flowgrid[®] valve or pilot system is exposed to pressure in excess of its rating it should be inspected for damage.

The 2" Single Port Type A Flangeless Flowgrid[®] Valve is an economical and easy to maintain top entry pilot operated valve for both gas and liquid operations. This space saving valve has a face to face dimension of only 3.03" for the 150/300 CL valve and 3.41" for the 600 CL valve. These dimensions are the same as the American Axial Flow[™] regulator, making the top-entry Flowgrid[®] Valve an ideal replacement.
